

**Frame material:** Available in different materials

**Frame:** 75 mm

**Usage:** Installation frame for different air filters

Frame size	Filter size
610 x 610	592 x 592
305 x 610	287 x 592

The robust mounting frames can be made of different materials, eg. galvanised metal or stainless steel or acidproofed, depending on customers' specific needs. Because of this, the frames will suit to different conditions better.

The frame have 4 elements which makes it easy to install and easy to use!

1. Keeps the filter stable in the frame.
2. The holder (a) presses the filter tight into the frame and the seal (b) makes it leak-proofed.
3. The frame is pre-drilled—easier to assemble.
