

MOUNTING FRAMES

Filter mounting frames provide a swift, cost-effective, and secure solution for sealing various types of bag filters, compact filters, and other filter frames, such as those used in ventilation units and the construction of filter housings and walls. Filters are easily installed using four clamps and the frames are designed with a robust and durable construction. Stainless steel versions are also available upon request.

Specifications

Material	Galvanized steel
Metal thickness	1,2 mm
Sealing	Polyurethane
Depth	72 mm
Locking clips	4 pcs

25 mm filter installed

48 mm filter installed
